STATE WATER RESOURCES CONTROL BOARD

DIVISION OF WATER RIGHTS

In the Matter of Permit 20631 (Application 29494)
Araujo Family Trust

**ORDER APPROVING EXTENSION OF TIME
AND AMENDING THE PERMIT**

SOURCE: Unnamed Stream tributary to Simmons Canyon thence Napa River
COUNTY: Napa

WHEREAS:

1. Permit 20631 was issued to Holopono, Inc. on July 6, 1992, and by assignment is presently held by the Araujo Family Trust.
2. A petition for a change of place of use and a petition for an extension of time within which to develop the project and apply the water to the proposed use was filed with the State Water Resources Control Board (SWRCB) on July 28, 1997.
3. The permittee has proceeded with diligence and good cause has been shown for such change and for an extension of time. Public notice of the change and request for extension of time was issued on August 19, 1997 and no protests were received.
4. The SWRCB has determined that neither the petition for change in place of use nor the extension of time constitute the initiation of a new right nor operate to the injury of any other lawful user of water.
5. The permit condition(s) relating to the continuing authority and water quality objectives of the SWRCB should be updated to conform to Section 780 (a & b), Title 23 of the California Code of Regulations.
6. Fish, wildlife, and plant species have been or may be listed under the Federal Endangered Species Act and/or the California Endangered Species Act. A condition should be placed in the permit making the permittee aware of possible obligations resulting from these acts.
7. There is the possibility that buried archeological deposits may be present and accidental discovery could occur. In compliance with the California Environmental Quality Act, which states that a Lead Agency is required to make a provision for historical or unique archeological resources accidentally discovered during construction or operation of projects, a condition should be included in the permit requiring notification of the Chief of the Division of Water Rights if project activities uncover any buried archeological materials.

NOW, THEREFORE, IT IS ORDERED THAT PERMIT 20631 IS AMENDED TO READ AS FOLLOWS:

1. Condition 8 of the permit be deleted and Condition 8 be amended to read:

Construction work and complete application of the water to the authorized use shall be prosecuted with reasonable diligence and completed by December 31, 2004.

(0000009)

2. The Place of Use shall be deleted and amended to read:

13 acres within the SW1/4 of NW1/4 of projected Section 32
21 acres within the SE1/4 of NW1/4 of projected Section 32;
13 acres within the NW1/4 of SW1/4 of projected Section 32;
5 acres within the SW1/4 of NE1/4 of projected Section 32; and
3 acres within the NE1/4 of SW1/4 of projected Section 32, all
within T9N, R6W, MDB&M.
55 acres total, as shown on map dated May 1997, on file with the SWRCB.

3. The continuing authority condition, shall be updated to read as follows:

Pursuant to California Water Code sections 100 and 275 and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the SWRCB in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the SWRCB may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirement for the authorized project. No action will be taken pursuant to this paragraph unless the SWRCB determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the SWRCB also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the SWRCB determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution article X, section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.

(0000012)

4. The water quality objectives condition, shall be updated to read as follows:

The quantity of water diverted under this permit and under any license issued pursuant thereto is subject to modification by the SWRCB if, after notice to the permittee and an opportunity for hearing,

the SWRCB finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the SWRCB finds that: (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges.

(0000013)

5. Permit 20631 is amended to include the following Endangered Species condition:

This permit does not authorize any act which results in the taking of a threatened or endangered species or any act which is now prohibited, or becomes prohibited in the future, under either the California Endangered Species Act (Fish and Game Code sections 2050 to 2097) or the federal Endangered Species Act (16 U.S.C.A. sections 1531 to 1544). If a "take" will result from any act authorized under this water right, the permittee shall obtain authorization for an incidental take prior to construction or operation of the project. Permittee shall be responsible for meeting all requirements of the applicable Endangered Species Act for the project authorized under this permit.

(0000014)

6. Permit 20631 is amended to include the following condition to protect cultural resources. Should any buried archeological materials be uncovered during project activities, such activities shall cease within 100 feet of the find. Prehistoric archeological indicators include: obsidian and chert flakes and chipped stone tools; bedrock outcrops and boulders with mortar cups; ground stone implements (grinding slabs, mortars and pestles) and locally darkened midden soils containing some of the previously listed items plus fragments of bone and fire affected stones. Historic period site indicators generally include: fragments of glass, ceramic and metal objects; milled and split lumber; and structure and feature remains such as building foundations, privy pits, wells and dumps; and old trails. The Chief of the Division of Water Rights shall be notified of the discovery and a professional archeologist shall be retained by the Permittee to evaluate the find and recommend appropriate mitigation measures. Proposed mitigation measures shall be submitted to the Chief of the Division of Water Rights for approval. Project-related activities shall not resume within 100 feet of the find until all approved mitigation measures have been completed to the satisfaction of the Chief of the Division of Water Rights.

(0000215)

7. All other conditions of Permit 20631 are still applicable.

STATE WATER RESOURCES CONTROL BOARD

PERMIT FOR DIVERSION AND USE OF WATER

PERMIT 20631

Application 29494 of Holopono, Inc.

765 Buena Vista Avenue, Santa Barbara, CA 93108

filed on May 12, 1989, has been approved by the State Water Resources Control Board SUBJECT TO VESTED RIGHTS and to the limitations and conditions of this Permit.

Permittee is hereby authorized to divert and use water as follows:

1. Source:

Tributary to:

<u>Unnamed Stream</u>	<u>Simmons Canyon thence</u>
<u></u>	<u>Napa River</u>
<u></u>	<u></u>
<u></u>	<u></u>
<u></u>	<u></u>
<u></u>	<u></u>
<u></u>	<u></u>

2. Location of point of diversion:	40-acre subdivision of public land survey or projection thereof	Section *	Township	Range	Base and Meridian
BY CALIFORNIA COORDINATE SYSTEM, ZONE 2 (1) ONSTREAM RESERVOIR NORTH 335,700 FEET AND EAST 1,844,500 FEET	SW $\frac{1}{4}$ OF NE $\frac{1}{4}$	32	9N	6W	MD
(3) ONSTREAM RESERVOIR NORTH 335,100 FEET AND EAST 1,843,900 FEET	NW $\frac{1}{4}$ OF SE $\frac{1}{4}$	32	9N	6W	MD
(4) ONSTREAM RESERVOIR NORTH 335,250 FEET AND EAST 1,842,400 FEET	NE $\frac{1}{4}$ OF SW $\frac{1}{4}$	32	9N	6W	MD

County of Napa * projected fractional

3. Purpose of use:	4. Place of use:	Section *	Township	Range	Base and Meridian	Acre
FROST PROTECTION						
IRRIGATION	SW $\frac{1}{4}$ OF NW $\frac{1}{4}$	32	9N	6W	MD	13
	SE $\frac{1}{4}$ OF NW $\frac{1}{4}$	32	9N	6W	MD	21
	NW $\frac{1}{4}$ OF SW $\frac{1}{4}$	32	9N	6W	MD	3
	SW $\frac{1}{4}$ OF NE $\frac{1}{4}$	32	9N	6W	MD	5
					TOTAL	42

The place of use is shown on map on file with the State Water Resources Control Board.

5. The water appropriated shall be limited to the quantity which can be beneficially used and shall not exceed a total of 37 acre-feet per annum to be collected from November 1 of each year to May 15 of the succeeding year as follows: 4 acre-feet per annum in Reservoir No. 1, 30 acre-feet per annum in Reservoir No. 3, and 3 acre-feet per annum in Reservoir No. 4. (0000005)

This permit does not authorize collection of water to storage outside of the specified season to offset evaporation and seepage losses or for any other purpose. (0000005)

6. The amount authorized for appropriation may be reduced in the license if investigation warrants. (0000006)

7. Construction work shall begin within two years of the date of this permit and shall thereafter be prosecuted with reasonable diligence, and if not so commenced and prosecuted, this permit may be revoked. (0000007)

8. Complete application of the water to the authorized use shall be made by December 31, 1996. (0000009)

9. Progress reports shall be submitted promptly by permittee when requested by the State Water Resources Control Board until a license is issued. (0000010)

10. Permittee shall allow representatives of the State Water Resources Control Board and other parties, as may be authorized from time to time by said Board, reasonable access to project works to determine compliance with the terms of this permit. (0000011)

11. Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust. (0000012)

12. The quantity of water diverted under this permit and under any license issued pursuant thereto is subject to modification by the State Water Resources Control Board if, after notice to the permittee and an opportunity for hearing, the Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the Board finds that (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges. (0000013)

13. The State Water Resources Control Board reserves jurisdiction to impose conditions to conform this permit to Board policy on use of water for frost protection. Action by the Board will be taken only after notice to interested parties and opportunity for hearing. (0000020)

14. Permittee shall maintain the existing outlet pipes in the dams for Reservoirs No. 1 and No. 3 in order that water entering the reservoir which is not authorized for appropriation under this permit can be released. (0050043)

15. Permittee shall install and properly maintain in the reservoirs a staff gage, satisfactory to the State Water Resources Control Board, for the purpose of determining water levels in the reservoirs.

Permittee shall record the staff gage readings on or about October 1 and November 1 of each year; and on or about March 15, April 15, and May 15 of the succeeding year. Such readings shall be supplied to the State Water Resources Control Board with the next progress report submitted to the Board by the permittee. A copy of the staff gage readings shall also be furnished to Dr. Lewis G. Carpenter and all successors in interest.

The State Water Resources Control Board may require the release of water which cannot be verified as having been collected to storage prior to October 1 of each year.

Permittee shall allow Dr. Lewis G. Carpenter, Jr. and all successors in interest, or a designated representative, reasonable access, upon notification of permittee's agent, to the reservoirs for the purpose of verifying staff gage readings and determining water levels in the reservoirs. (0000040)

16. For the protection of fish and wildlife on the Napa River, permittee shall not divert unless the Napa River flows, measured at the nearest U.S. Geological Survey Gaging Station on the Napa River, are:

- a) 1.0 cfs or greater during the period of November 1 through November 14.
- b) 15.0 cfs or greater during the period of November 15 through February 29 of the succeeding year.
- c) 10.0 cfs or greater during the period of March 1 through May 15. (0140060)

17. During the period between March 15 and May 15, water may be collected to storage under this permit only when there are no restrictions imposed by the watermaster on diversions from the Napa River. (0590900)

18. The total quantity of water diverted to storage in Reservoir No. 1 under this permit, together with that diverted under the license issued pursuant to Application 12975, shall not exceed 20 acre-feet per annum. (0000114)

This permit is issued and permittee takes it subject to the following provisions of the Water Code:

Section 1390. A permit shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code), but no longer.

Section 1391. Every permittee shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a permit is issued takes it subject to the conditions therein expressed.

Section 1392. Every permittee, if he accepts a permit, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any permit granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any permittee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any permittee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).
